

If you are new to dancing, then you'll like our Beginner's dance lessons. Here you will quickly master the basic steps of all the popular dances. No partner is required!

Ezyway Approach

We have a unique, tried and tested approach to get you out there dancing in the quickest time possible!

It is quite simple - it works by repetition. We split the many dances we teach you into two groups, then teach you the basic steps of these dances every week.

This means that every two weeks, you repeat the same dance steps and they quickly become 'second nature'.

The problem with other approaches, such as learning the one dance in a session, is that it becomes weeks or months before that style is taught again, and by then the student has

forgotten that dance so needs to begin again.

Partner Not Required

In our Beginner's Lessons we teach you without a partner! This lets you learn at your own pace.

It is difficult enough to learn the dance steps, without also having to address all the issues of dancing with a partner.

And by learning the steps on your own, you are neither rushed nor slowed down by others. Each works at their own pace.

We get very good feedback on our approach and we find most of our students are ready to 'move up' to the Intermediate classes after only about 6 to 10 weeks!

Don't Be Shy

It can be a bit intimidating starting something new. We would like to assure you that you don't have to worry with us!

We have a very social and casual group - always ready to meet new comers and provide words of encouragement.

We welcome everyone - and you will see that if you are struggling (and we all struggled at the beginning) there are many other students who will jump in and help you out.
